2 A viewer for displaying an electronic book having various text-to-speech and
3 speech recognition features. The viewer permits a user to select text in a displayed
4 electronic book and have it converted into corresponding speech. In addition, a user may
5 have the viewer automatically perform text-to-speech conversion for an entire displayed
6 electronic book or a particular page of the electronic book. The viewer also permits a
7 user to enter voice commands.
